

Engineering Department

CIP Project Number: ST1002

Title: Paradise Point Lt Turn Lane

Project Phase: Design/Construction

% of Phase Completion

Design Construction

Cost for this Phase: \$190,000

Funding Sources: Fund Balance

Project Manager: Keisha Seals

Contractor: TBD

Consultant: TBD

Project Description:

Project consists of design and construction of the hooded left turn lane into Paradise Point from US 90A.

Justification: After completion of the US 90A project the Engineering Department conducted an analysis to determine if a left turn lane would be acceptable to TxDOT. It was determined that this turn lane would reduce the u-turn movements at Lambardy where a current sight distance issue was created by the sound wall. TxDOT has agreed with the findings and staff is moving forward with gaining their approval..
